

London Labour Market — CEO 6-Metric Dashboard

Common design for Power BI and Tableau

The six metrics

ID	Metric	Definition	Unit
M1	City Boroughs	City Boroughs	
M2	City Boroughs	City Boroughs with robust flag	
M3	Average	Average borough unemployment rate	
M4	Average	Average borough inactivity rate	
M5	Average	Average borough jobs density	
M6	City Boroughs	City Boroughs score with rank context	

Dashboard layout

1 — *CEO Overview*

Six KPI cards; borough priority map; top priority ranking; tier distribution; executive annotation.

2 — *Borough Detail*

Single borough selector; six metrics; borough vs London benchmark; priority and robustness explanation.

3 — *Priority & Robustness*

Ranking; robustness; scenario/sensitivity view; intervention themes.

Governance

- Use identical metric definitions in both tools.
- Do not turn missing observations into zero.
- Do not present the priority score as causal.
- Keep robustness visible.
- Reconcile headline numbers to the approved analytical reference.
